

DIY PAPER WHEELS

how to get the size you want

final size	paper width	paper length
1"	0.5"	4.25"
2"	1"	8.25"
3"	1.5"	12.25"
4"	2"	16.5"
5"	2.5"	20.5"
7"	3.5"	28.5"
10"	5"	41"
12"	6"	49"
15"	7.5"	61.25"

paper wheels start as rectangles

Paper length/long side = Desired width * 3.14 * 1.3. Round up by ¼ inch. I use 1cm creases.

Paper width/short side = Half your desired wheel width.
